

EXPERIMENT NO: 6

Mapped Course Outcome: CO5

Aim:

Reclassifying Fields using IBM SPSS Modeler

Objective:

We need to clean the data by re-classifying fields in the dataset using Reclassify node of IBM SPSS Modeler.

Related Theory:

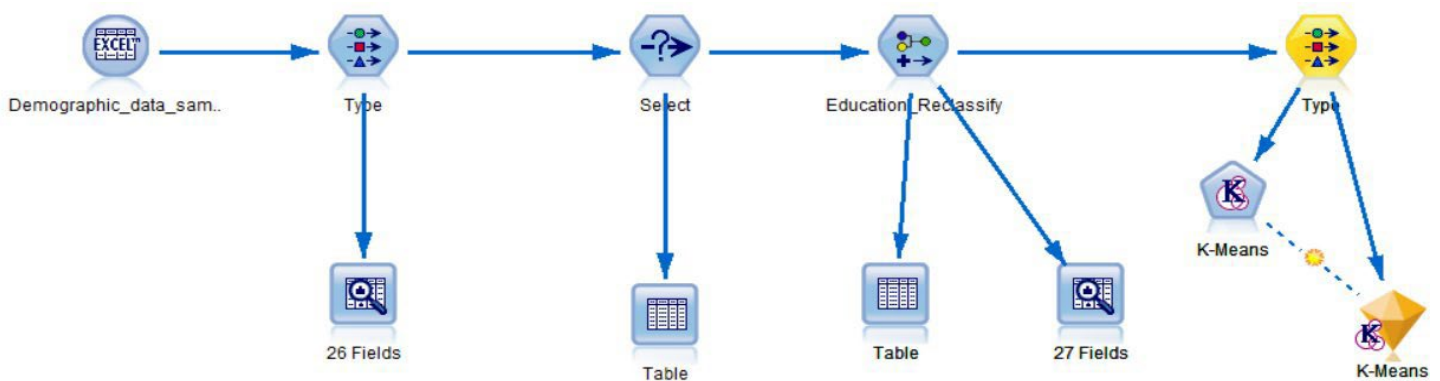

1. Why do we need to reclassify fields?
2. What is Reclassify Node

Procedure:

Reclassifying Fields using Reclassify node of IBM SPSS Modeler

- 1) Import Dataset
- 2) Connect with type node.
- 3) With Data audit node check for other data attributes
- 4) Use Reclassify Node to reclassify the fields.
- 5) Use Table node/ Data Audit node to verify whether the reclassification is done properly or not.

Results:
