

## EXPERIMENT NO: 2

Mapped Course Outcomes- CO1

### Aim:

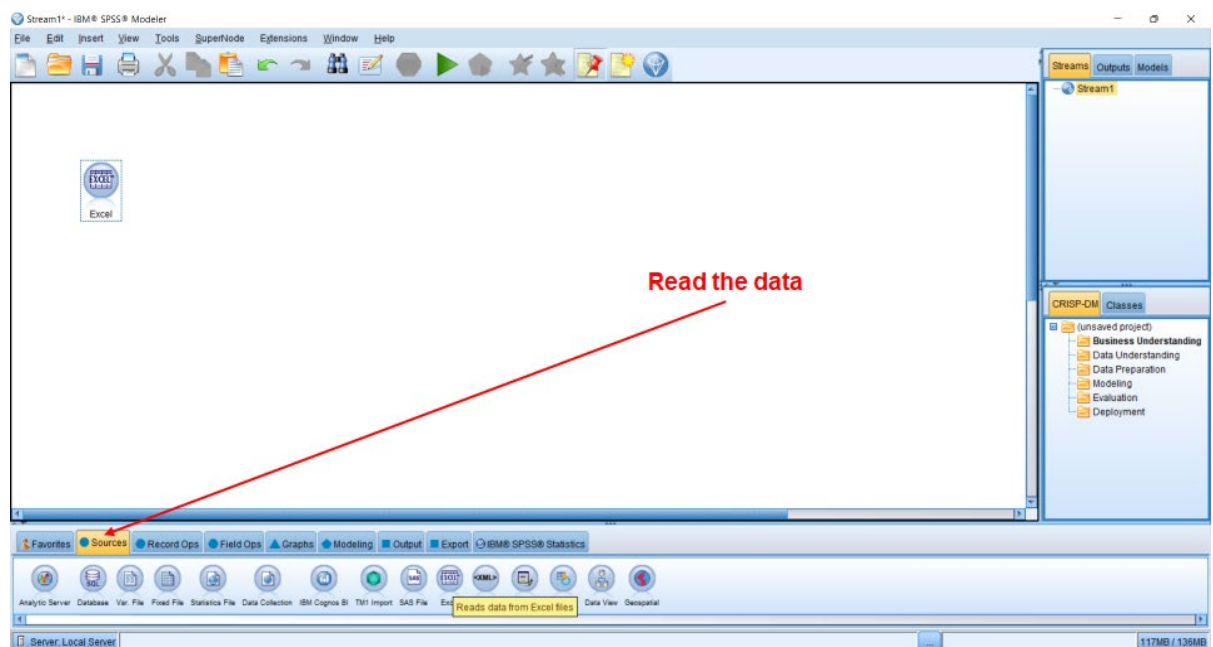

Setting the Unit of Analysis

### Objective:

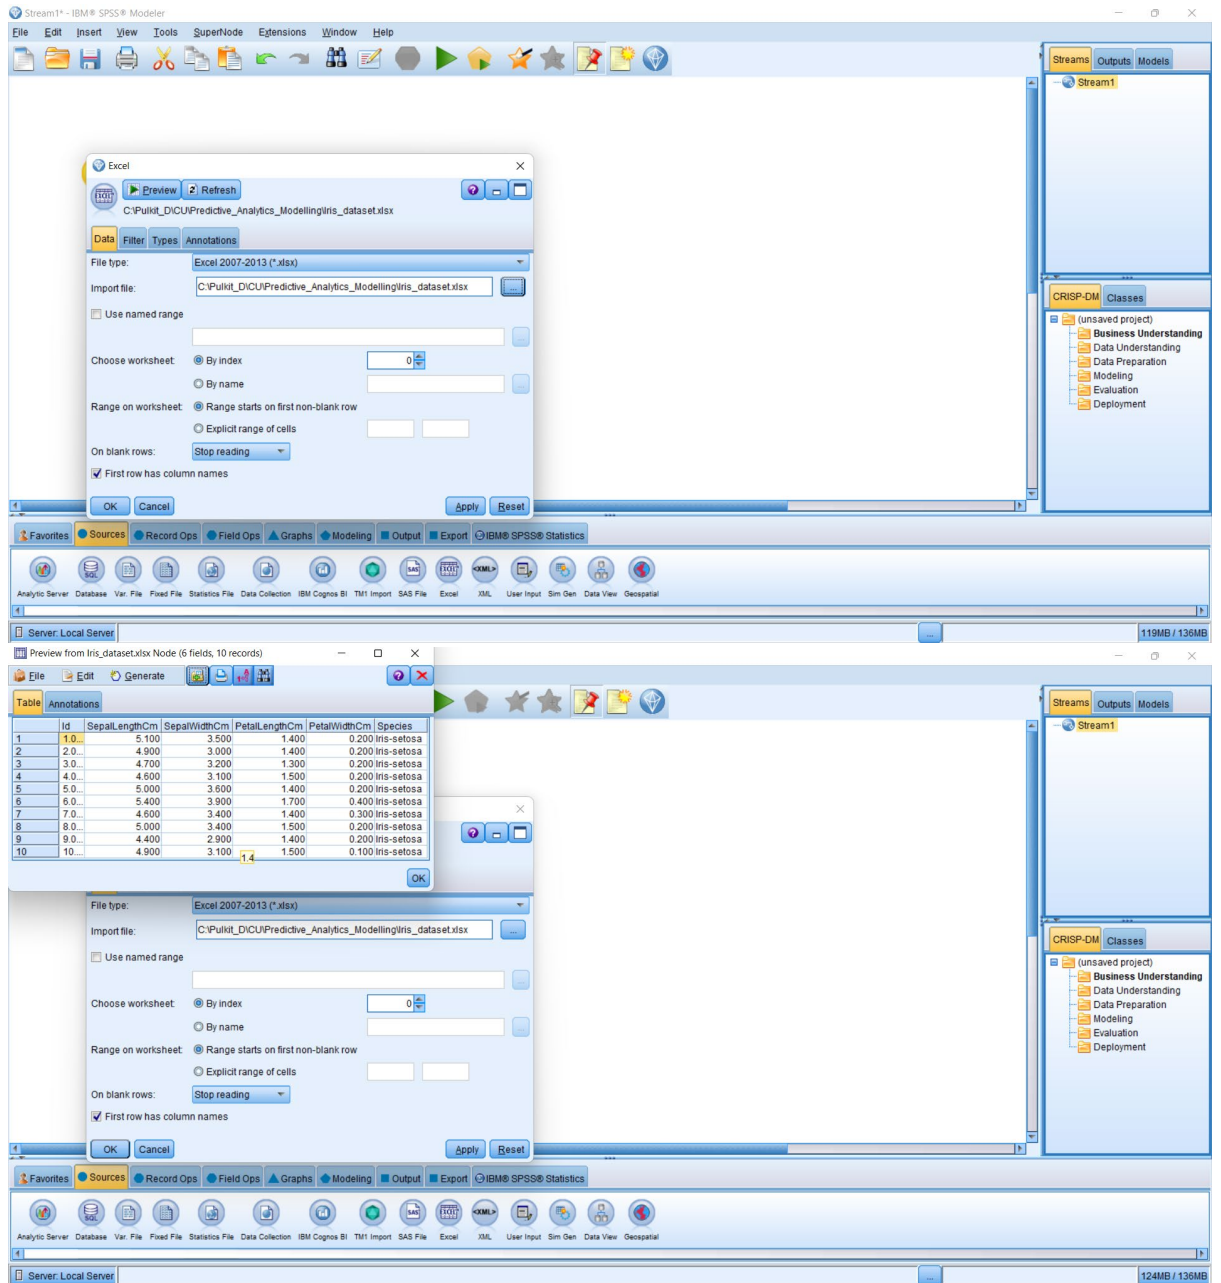

We need to import the dataset in IBM SPSS Modeler and set the unit of analysis

### Procedure:

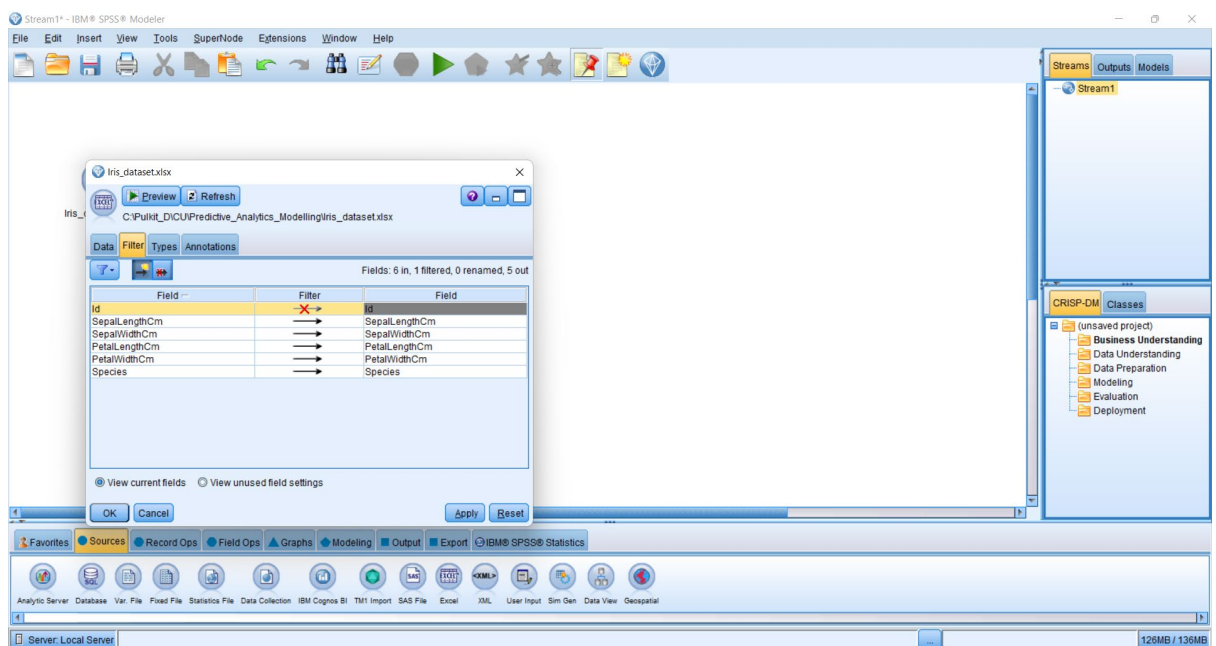

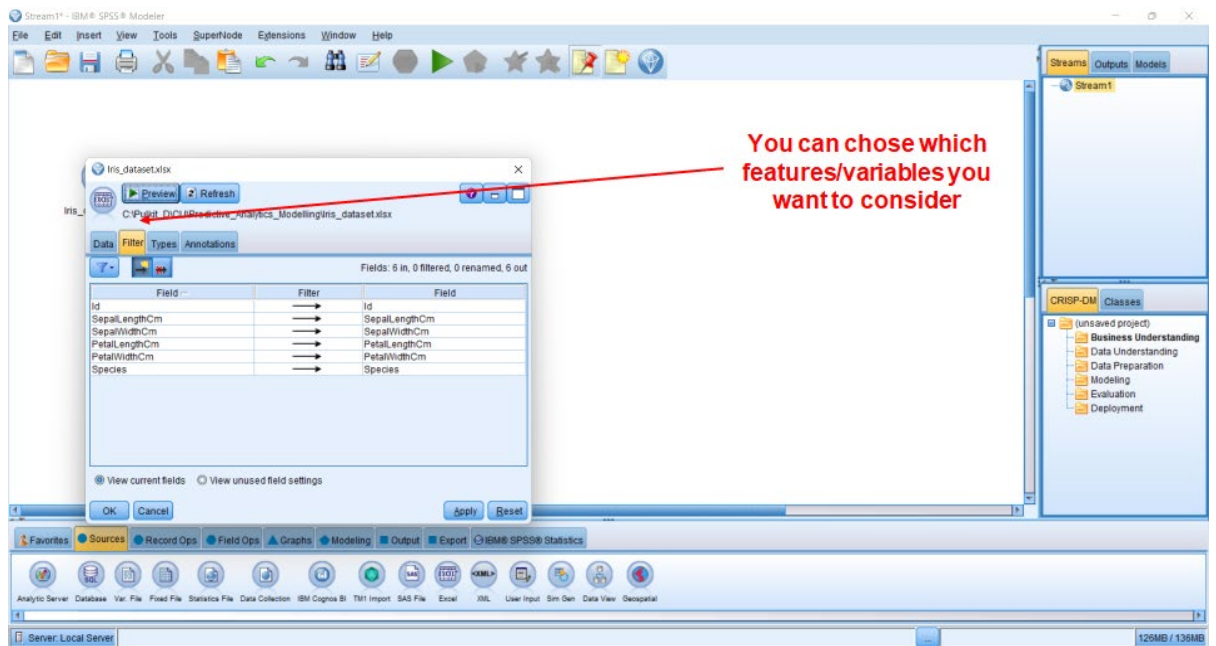

1. From Sources, choose the Excel node to read the dataset.

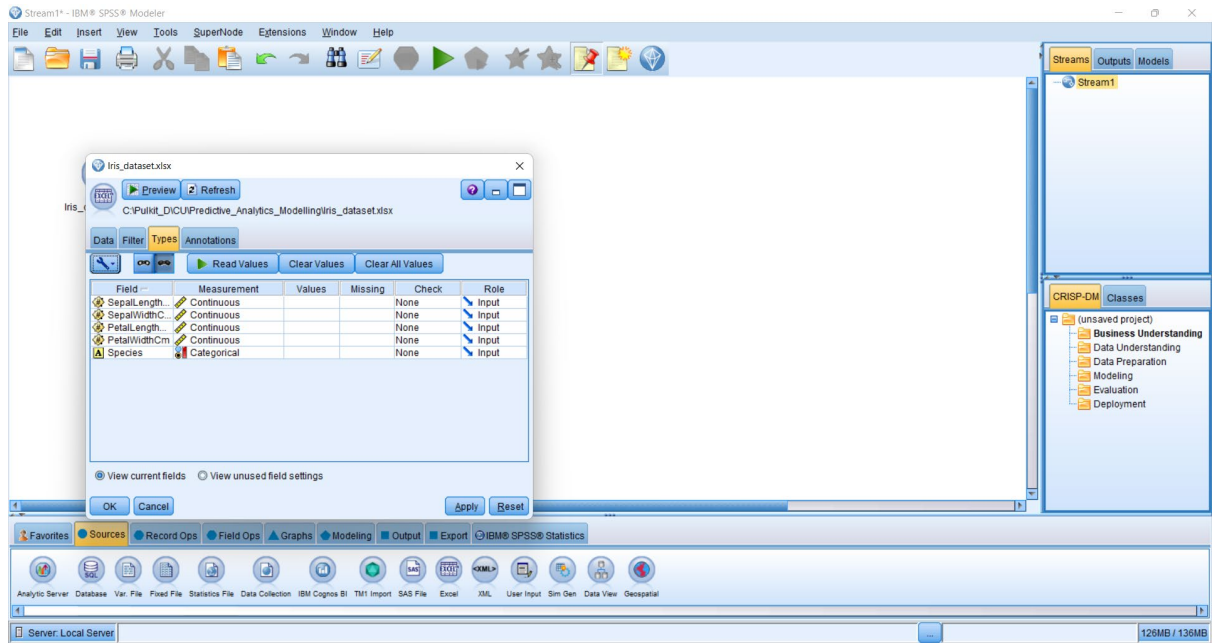

2. Once data is loaded, it can be previewed from the Preview Tab.

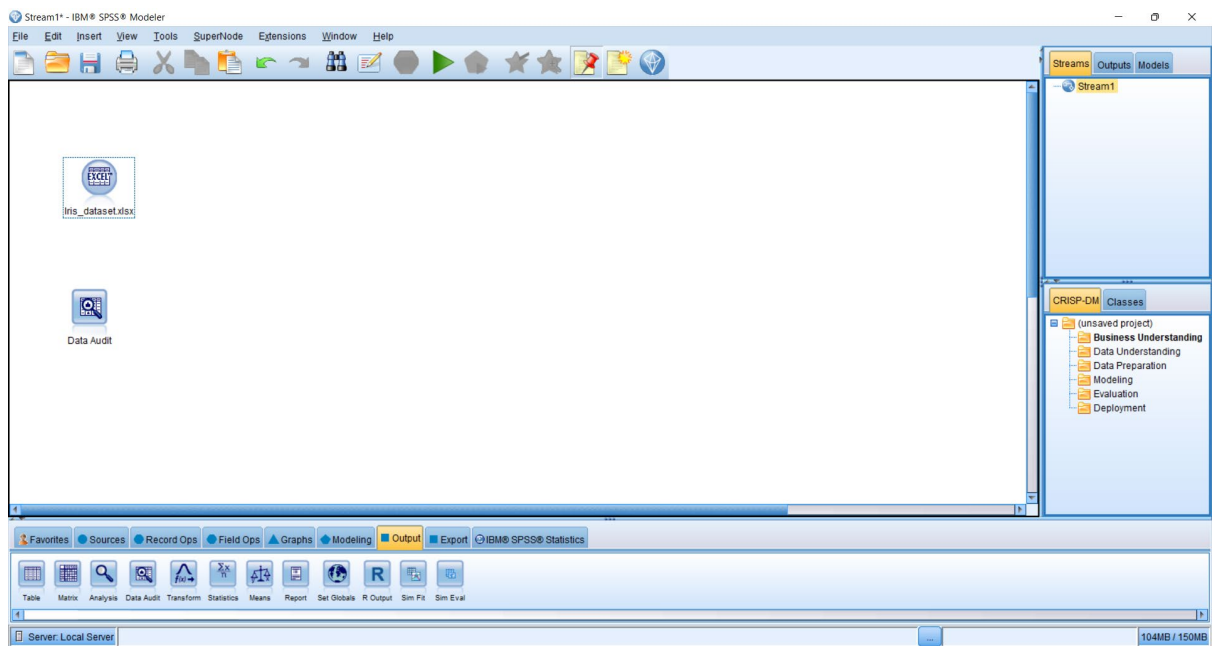

3. You can choose unit of analysis

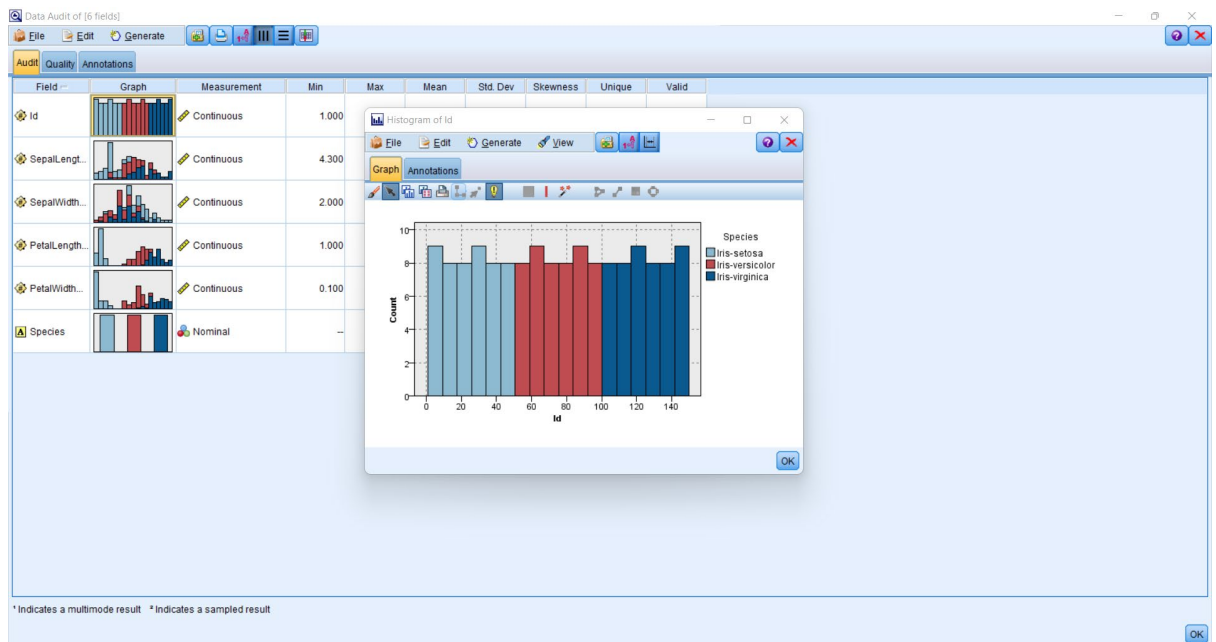

#### 4. Check feature types

## 5. Check Data Audit Node

## **Output:**

Data is loaded successfully and initial data exploration is done with the help of data audit node.
