EXPERIMENT NO: 8

Aim:

Sorting Cases using Sort Node of IBM SPSS Modeler

Objective:

We need to sort the fields in the dataset using Sort Node of IBM SPSS Modeler

Related Theory:

1. Why sorting is required?
2. What is Sort Node

Procedure:

1. Import Dataset
2. Connect with type node
3. Choose Key Field for sorting in ascending/descending order. Data will be sorted.
4. Verify the data by connecting with the Table Node

Results:

Key Learning Outcomes:

1.

2.

3.
